## 2. PRESENTATION

The objective is for students to present an original work closely related to research in the field of Bilingual Education, curriculum and course design in CLIL (Content and Language Integrated Learning), or the management of bilingual centers. The work will consist of, at a minimum, the following sections:

- Introduction.
- Justification.
- Methodology (research or didactic).
- Proposals (action or didactic).
- Results and conclusions.
- References.

The work will be supervised by one of the program's professors, and the choice of the topic is free. The student will need to orally defend it in front of a panel, which will assess both the oral presentation and the content of the written work. The evaluation process concludes with an assessment of the level of learning achieved by the student, expressed in numerical grades, in accordance with current legislation. Additionally, an individual defense of the Master's Thesis will be ensured, as indicated in the table of training activities, under the section of oral presentation of works.
